

YUVARAJ C

B.Tech-AI&DS Student

yuvarajspartan10@gmail.com | 7904286683 | github.com/YUVARAJC14

CAREER OBJECTIVE

Student with hands-on experience in app development, machine learning and data-driven projects. Skilled in Python, Java, Kotlin, and web/mobile technologies with strong problem-solving and collaboration skills. Experienced in technical support and research projects, delivering practical solutions to real-world problems.

RESEARCH PROJECT

Personalized Notification Reminder Using Machine Learning

Tools & Technologies: Python, Android Studio / Kotlin

- Implemented a recommendation system to adapt reminders based on user behavior and preferences
- Integrated machine learning models for predicting optimal notification timing to maximize user engagement
- Built and tested the app with a user-friendly interface, ensuring smooth functionality

Acoustic Feature Based Scam Call Detection

Tools & Technologies: Python, Librosa, Scikit-learn, TensorFlow/Keras, Jupyter Notebook

- Built a classification model to detect scam calls by analyzing acoustic and speech features
- Extracted and engineered audio features to capture voice patterns
- Achieved 94% accuracy in distinguishing scam vs. genuine calls

EXPERIENCE

Computer Technical Staff

MAR 2026 to MAY 2026

- Assisted faculty and students with troubleshooting hardware/software issues, minimizing downtime in classrooms
- Maintained and supported computer labs, ensuring smooth operation of systems during school activities
- Designed and prepared aptitude question papers to support student assessments and skill development

EDUCATION & CERTIFICATIONS

- B.Tech in AI&DS - 2022 - 2026 | CGPA: 8.38%
- Class 12 - 2021-2022 | 83.3%
- Class 10 - 2019-2020 | 71.2%
- Aws Cloud Partioner(ongoing)

SKILLS & LANGUAGES

- Programming Languages: Python , MySQL , C , C++ , Java
- Web Technologies: HTML , CSS ,
- Tools: Android Studio , Pycharm , VS code ,
- Tamil,English,Chinese(Basics),Hindi(Basics)
